**Date:** 05/15/2009 06:01 PM

---

Thank you Nicole. We really appreciate it. It was getting confusing:

May 26 - TASC  
 May 27 - SSMAC  
 May 28 - Workgroup.

Chris

Dave,  
 Somewhere, we have a date mix up. The only sub committee of the West Hills NC is the SSMAC - on the 27th as I have stated to you.  
 I just got off the phone with Dr. Wiseman. He creates the agenda. He does recall an email mentioning the 24th from Nicole.  
 I know that we have been trying to set things up for some time - did an earlier email from me give the 24th date? **That may have been for June 24th. In May, it is the 27th** . Almost always a Wednesday to avoid conflict with other meetings.  
 Sorry, there is so much confusion.

Chris --

Craig told me that he and Nicole were making a PowerPoint presentation on EPA's rad studies to a sub-committee of the West Hills Neighborhood Council on the 24th of June. I understood from him that you had requested it.

David,

The letters - three - came today for the TASC meeting. Yes - I have that date as the 26th as we discussed. Thank you for allowing me to give input for that date.

The SSMAC meeting is on the 27th. Are you confusing us (the West Hills Neighborhood Council Santa Susana Mountain Area Committee) with the SSMPA - the Santa Susana Mountain Parks Association?

I don't know anything about a meeting on the 24th.

Thanks.

Chris

Chris --

I've been out of the office this week and just got back today.

I hope that EPA's fact sheet arrived in your mail box. It was mailed while I was out of the office. The fact sheet includes an announcement of the TASC meeting on May 26. You might recall that I confirmed your availability on the 26th after you reminded me that your SSMAC meeting was on the 27th (the date EPA had originally proposed for the TASC meeting). I was very pleased that you were able to meet with us on the 26th. The meeting will be held at the Radisson. Please let me know if you did not receive the fact sheet in the mail.

I believe that EPA will be attending your SSMAC meeting on June 24th.

I look forward to seeing you on May 26th.

Nicole and David,  
I have never seen anything definitive about the May 26th meeting.

The SSMAC is on Wednesday, May 27th (almost always the last Wednesday of every month). David had originally mentioned that date as a meeting date, and I said that was the date of the SSMAC.

Please clarify your plans for the EPA meeting details.

If you want to be on the agenda on May 27th, we would love it. Please contact Dr. Wiseman - he makes the agenda.

Thank you so much!

Chris-

Thanks for your note. I'm happy to hear you had a good meeting with fellow EPA colleagues. My understanding is the meeting that is scheduled for May 26 is to discuss the very request you mention below. EPA staff, including Craig Cooper and David Cooper, will be meeting with you and others along with our Technical Assistance contractor to discuss the needs you have as a community to assist in reviewing technical documents that we produce. The technical assistance contractor will be on hand to hear directly from you regarding your needs.

Craig and I have the June 24 meeting on our calendars to come speak to the Santa Susana Mountain Area Committee. I hope this date still works with you.

Also, we would like to hold our next community meeting in mid-July and will get more information out on that soon.

Take care. Let me know if you have any questions.

Nicole

Subject: The Nicest Guys

---

David, Craig, and Nicole,

I met the Nicest guys today from the EPA at Senator Feinstein's office. We spoke for about a half an hour on the Santa Susana Field Lab, and the San Fernando Valley aquifer Superfund sites.

They encouraged me to become involved particularly with David. So David - here I am.

We talked about getting funding for experts - scientists that can read documents for us that are neutral. How can we get these experts? This is what we ask at our Santa Susana Mountain Area Committee all of the time.

I do hope that if you are in town on May 27th, you will swing by the Santa Susana Mountain Area Committee. The meeting will be at the Fairwinds Retirement Center on Roscoe and Woodlake at 7:00 PM.

Tom Seckington of DTSC will be there to talk about groundwater. I was hoping I could talk Bob Fitzgerald into coming and telling us about the aquifer system - then or at another time.

Have you set up a date for your next meeting?

Thanks!

Chris Rowe
